functionality available from a keyboard.				
	2.1.2 No Keyboard Trap	Α	C!!t	
	, '		Compliant	
	2.2.1 Timing Adjustable	Α	Compliant	
enough time to read and use content.				
	2.2.2 Pause, Stop, Hide	Α	Compliant	
Guideline 2.3 Seizures: Do not design	2.3.1 Three Flashes or Below Threshold	Α	Compliant	
content in a way that is known to cause				
seizures.				
Guideline 2.4 Navigable: Provide ways to	2.4.1 Bypass Blocks	Α	Not Compliant	There is a link to skip blocks of repetitive content provided, but it does not function properly. When it is activated the link to skip blocks of repetitive content must move the focus to
help users navigate, find content, and				the main content or to the section of the page that is indicated by the link.
determine where they are.				
				You used: The focus does not move to the body of the page when the skip link is activated.
				Skip to Main Content
				
				Our suggestion: Move the local anchor to occur after the last navigational item in the header.
				Skip to Main Content
				
				<h1>Cost-effective website accessibility analysis for your disabled visitors</h1>
	2.4.2 Page Titled	Α	Compliant	
	2.4.3 Focus Order	Α	Compliant	
	2.4.4 Link Purpose (In Context)	Α	Compliant	
	2.4.5 Multiple Ways	AA	Not Compliant	At least two ways need to be available to find the other web pages on the site.
				You used: You have provided a site map.
				Our suggestion: Providing alternative means of finding other pages on this site can be most easily be achieved by including a search function and a site map.
	2.4.6 Headings and Labels	AA	Compliant	
	2.4.7 Focus Visible	AA	Not Compliant	The focus must remain visible at all time. It must be visually apparent which element has the current keyboard focus so that keyboard and low-vision users are able to orient themselves
				on the page and do not become lost.
				You used: At the bottom of the page are two links, "Tell a Friend" and "Free Signup" that are styled to appear as buttons. CSS has been used to remove the visible focus from the links.
				.subscribe_box button {border: none; }
				Our suggestion: Remove the CSS properties that have been used to disable the focus outline on these elements.
	3.1.1 Language of Page	Α	Not Compliant	A default language must be programmatically set to allow the assistive technology to read the content in the appropriate language.
readable and understandable.				la contra de la contra del la contra del la contra del la contra del la contra de la contra de la contra del la contra d
				You used: You have not set the default language of the page.
				Our suggestion: <html lang="en"></html>
